2N Integration HUB > CRESTRON

CRESTRON

ABOUT COMPANY

At Crestron we build the technology that integrates technology. Our automation and control solutions for homes and buildings let people control entire environments with the push of a button, integrating systems such as AV, lighting, shading, security, BMS and HVAC to provide greater comfort, convenience and security. All of our products are designed and built to work together as a complete system, enabling you to monitor, manage and control everything from one platform. In addition to its World Headquarters in Rockleigh, New Jersey, Crestron has sales and support offices throughout the U.S., Canada, Europe, Asia, Latin America, and Australia.

INTEGRATION WITH 2N PRODUCTS

Seamless integration of 2N IP video intercoms with Crestron touch screens makes entry access more secure and worry-free. 2N video intercoms door stations are Rava® SIP compliant and can be set up to call all Crestron TSW-x60 series touch screens. You get a premium video intercom solution that seamlessly integrates with your electronic door locks and home automation system.

Crestron touch screens deployed with the Crestron Home operating system will instantly recognize 2N IP video intercom, so they can be added to the Crestron smart home system without the need for complex programming. A custom programming option is also available for deployment of more advanced functionality. Now, Crestron residential integrators can add another layer of security at every entry door to their smart home designs.
